MINES AND MINING.

Visit to Several Ore-Product Properties near the City.

COYOTE CANON MINES.

Sanday morning a representative of THE CITIZEN, in company with Col. W. T. Donavan, paid a visit to the wellknown Coyote canon, where the celebrated Coyote Springs mineral water is located. The trip was made in three hours and the first stop was at the colonel's dug-out under a mound, in which he stores his mining utensils, Then the Astor mine, about one hundred yards to the south, was visited. This mine is owned and operated by J. A. Marshall, of Lancoln, Neb., and the colonel. The main shaft goes down on an incline for forty feet, where three drifts are run off to the south, twelve, lifteen and twenty feet respectively, and all showing fine ore. Here the main shaft dips more perpendicular and continues further for a distance of sixty feet ore bearing rock all the way down and a large body in the bottom of the shaft. There are about a hundred tons of ore on the dump, only waiting to be smeltered, when its returns would enrich its owners many thousand dollars. The rock carries gold and silver, is easily worked and by the Marshall process of treating ore runs \$70 to the ton. The be a paying institution from the start rock also contains a large per cent of lead. Last summer considerable work fractory and can easily be worked.

on the dump. Last summer the colonel saver, and one piece of rock assayed in

and a balf up the mountain sides. has received no special development but the surface rock, which has been assayed, shows encouraging returns silver and lead. The ore is not refrac tory and can easily be worked by any process used by smelters. It is th colonel's opinion that the Silver Bel will yet be recognized as one of the oes paying properties in the Covote cano group of mines.

Leaving the Silver Boll, and bearing

slightly northward, the Baid Eagle, owned exclusively by Col. Donavan, reached after a hard travel to almost the very summit of the mountains. The owner has developed the Baid Eagle t a distance of forty feet in a perpendicu lar shaft, and several tons of ore are on the dump. The ore has been assayed several times and run 18 per cent lead and 12 ounces in silver to the ton. The Baid Eagle is located about 8,000 fee above sea level and a splended view of the Rio Grande valley and the plateau from it as far as the eye can see borth and south is obtained. Albuquerque and the smaller towns, such as Los Lunas, Belen, Isleta and others are plainly observed.

J. R. Murphy, the well-known miner from Copper City, recently visited the above mines and he was well pleased with them. It is his opinion that should some enterprising, wealthy man erect a smelter near them, that it would The ore rock is not by any means re
